

**'SpeechPOD DUAL<sup>®</sup> SD Evolution' Voice Warning System** (Part No CSA-DUAL)

Brand new for 2012, the SpeechPOD DUAL SD Evolution is the first product to incorporate SD flash memory technology.

SpeechPOD DUAL SD Evolution incorporates a two PIR motion sensors and is designed to provide directional voice messages in any area of a facility to warn of special risks or hazards such as slips, trips and falls, infection control procedures, hygiene requirements, security monitoring or point of sale merchandising.

Fully programmable with a simple hand held remote, SpeechPOD SD Evolution is a truly global product with the ability to play any audio file in any language without the need for complex programming knowledge.

**Product Features**

- On sensing the presence of people moving in one direction, SpeechPOD DUAL SD Evolution will play any pre-programmed voice files in any language. If people are moving in the opposite direction SpeechPOD DUAL SD Evolution will play a different pre-programmed message.
- Time delays between messages are selectable via the remote programmer to ensure that the message is broadcast at the right time.
- Up to 100 messages can be pre-programmed and selected either individually or sequentially where each message in the list is played in turn on each activation.
- SpeechPOD SD Evolution contains a Windows<sup>®</sup> based file structure which allows simple 'drag and drop' file copying for ease of programming.
- New SmartWave<sup>®</sup> hi-resolution voice playback software produces crystal clear hi-fidelity audio files to be broadcast in any location.
- SpeechPOD SD Evolution can be powered simply by 4 x AA alkaline batteries, or connected to the mains through a 6Vdc power supply unit for high traffic areas.
