

**'Cig-Arrête® SD Evolution' Flame & Motion Detector (Part No CSA-FSV)**

Brand new for 2012, the Cig-Arrête® SD Evolution is the first product to incorporate Multiple Detection Technology.

Part No CSA-FSV incorporates Flame and PIR motion detection and is designed to provide voice messages in any area of a facility to warn of illicit tobacco smoking, special risks or hazards such as slips, trips and falls, infection control procedures, hygiene requirements, security monitoring or point of sale merchandising.

Fully programmable with a simple hand held remote, the Cig-Arrête® SD Evolution product range is a truly global product with the ability to play any audio file in any language without the need for complex programming knowledge.

**Product Features**

- On sensing the presence of a flame or people, Cig-Arrête® SD Evolution will play any pre-programmed voice files in any language.
- Time delays between messages are selectable via the remote programmer to ensure that the message is broadcast at the right time.
- Up to 100 messages can be pre-programmed and selected either individually or sequentially where each message in the list is played in turn on each activation.
- Cig-Arrête® SD Evolution has a special 'Cleaner Mode' which allows cleaners to set a warning message for a wet and slippery floor. After a preset time, the motion sensor reverts to its original settings without the need for manual intervention.
- Cig-Arrête® SD Evolution contains a Windows® based file structure which allows simple 'drag and drop' file copying for ease of programming.
- New SmartWave® hi-resolution voice playback software produces crystal clear hi-fidelity audio files to be broadcast in any location.
- Cig-Arrête® SD Evolution can be powered simply by 4 x AA alkaline batteries, or connected to the mains through a 6Vdc power supply unit for high traffic areas.

"Please do not smoke in this area"
