

SaniTether Cleanable, Hygienic Tethers

SaniTether is a new product aimed at solving the problem of providing a cleanable method of attaching equipment to the patient environment.

SaniTether is completely durable and is easily sanitized along with the patient environment.

SaniTether is available in a choice of colours, lengths and associated fittings.

SaniTether is the sister product to the highly successful SaniPull product, and is manufactured from the same highly durable vinyl and incorporates a plastic spring clip that is specifically designed to securely and safely attach the SaniTether cord to external fixtures and fittings.

The clip is easily attached to any length of Sanipull ribbon and can be used to connect the SaniTether to patient wander alarms, or equipment to the patient bed rail for ease of use and to prevent non-sterile equipment being moved from patient to patient.

SaniTether is available in 1 metre, 2 metre and 3 metre lengths, pre-cut and individually packaged. The choice of ancillary components is up to the customer, with the spring clips, and securing bolts available as an additional purchase.

The SaniTether offers the most flexible solution for an easily cleanable tether which has many uses within any hospital facility.

Product Order Details

Cleanable vinyl ribbon pulls in white, orange, red or blue (add W, O, R, or B at the end of the order code) fitting packaged individually
